

Fostering a future-ready information workforce

Monday, March 30, 2026, at 1:00-2:30pm

Please join us for a panel presentation and discussion on findings from three recent Ithaka S+R studies that highlight how information users and library leaders are navigating technological, social, and institutional change, and the implications of these findings for iSchool curricula and professional development.

Libraries and scholarly communication at Ithaka S+R

Ithaka S+R is part of ITHAKA, a nonprofit with a mission to improve access to knowledge and education for people around the world. Within our Libraries and Scholarly Communication program area, our research and advisory projects reexamine the nature of work within research libraries, archives, and cultural heritage organizations while supporting the dissemination and preservation of scholarship.

Recent projects

- [What does Generative AI Mean for Scholarly Publishing?](#)
- [Assessing the Diversity of Library Collections: A Cohort Project](#)
- [Governance and Business Models for Collaborative Collection Development](#)

Future directions

Building on the findings to be discussed in this session and other complementary research, we look forward to exploring these topics with the broader community in future projects:

- New competencies needed for 21st-century library workers
- College closures and the impact on libraries
- AI in Action: a cohort project for academic libraries
